

Aoxio update instructions

Important Before applying the update **v 1.8** make sure you are using **v 1.7** (You can check the current version to login your admin panel > footer), If you are using an older version please contact our support codericks.envato@gmail.com to get the previous versions.

Step 1: Download the latest script and extract it on your pc. Open **aoxio_v1.8 > updates > v1.8 > uploads** folder there you will see **3 zip files** in this folder and you need to upload those files in your server please follow the below directions carefully.

- **application.zip** > upload path: Goto your project **root folder > application** upload this zip file and extract it inside this folder.
- **assets.zip** > upload path: Goto your project **root folder** upload this zip file and extract it
- **config.zip** > upload path: Goto your project **root folder > application > config** upload this zip file in this folder and extract.

Step 2: Open the latest downloaded script and upload this “**updates**” folder on your server project root folder and replace.

Step 3: Open a browser and write a url like this: **www.yourdomain.com/updates/v1.8** you will see a page like below here enter your item purchase code for update this script.
